...MINUTOVKY

pro vzdělávací oblast Matematika a její aplikace dle RVP ZV

2. ročník / 1. díl

1. Sčítání a odčítání v první desítce
2. Sčítání a odčítání ve druhé desítce
3. Sčítání a odčítání do 20 bez přechodu desítky
4. Sčítání a odčítání do 20 s přechodem desítky
5. Sčítání a odčítání v oboru do 100

Důležitou součástí matematiky na základní škole je pamětné počítání. Aby měly všechny děti možnost získat v něm potřebnou jistotu a zábělost, doplnili jsme na základě požadavků učitelů učebnici Matematika a její aplikace pro 2. ročník ZŠ Matematickými ...minutovkami. 128 cvičení rozdělených do dvou sešitů je zaměřeno na důkladné nacvičení pamětného počítání, sčítání, odčítání, násobení a dělení v číselném oboru do 100 v přímé vazbě na výše uvedenou učebnici matematiky.

Milé žákyně, milí žáci.

Abychom vám počítání zpestřili, připravili jsme do vašich pracovních ...minutovek soutěž na celý školní rok. Pravidla jsou jednoduchá. V rohu každého listu je obrázek. Může si jej vystrihnout ten, kdo při řešení příkladů na daném listu neudělal ani jednu chybu nebo udělal chyb nejméně ze třídy. (Výpočty vám zkонтroluje vyučující.) Vystrižený obrázek pak řešitel nalepí na volné políčko do soutěžní karty (na konci sešitu). Kdo bude mít na konci nejvíce políček přelepených, je vítězem soutěže v prvním pololetí.
